

**A.L.F. INTRODUCTORY SEMINAR – MAY 15-16, 2009 – VANCOUVER B.C. CANADA
DR. DENNIS STROKON - CRANIALIGN INC.**

DATES: **Friday May 15 and Saturday May 16, 2009**
Registration is at 8:30 a.m. Friday May 15, 2009
Sessions will be from 9:00 a.m. to 4:30 p.m. daily.
Wine and cheese reception Friday at 5:00 p.m.

LOCATION: **The Fairmont Hotel, Vancouver International Airport, Vancouver, Canada**
Hotel reservations, phone: 800-441-1414. For seminar room rates specify Group Code CRAN 1
Pay-parking at Airport Daily Lot or Fairmont Hotel valet

**AN INTRODUCTORY COURSE IN THE DESIGN AND USE OF THE ADVANCED LIGHTWIRE FUNCTIONAL
~ THE A.L.F. APPLIANCE ~**

On Day 1 Dr. Strokon discusses the concept of the A.L.F. appliance and the importance of understanding cranial movement as it applies to dentistry. The principal variations in the morphology and function of the skull and face are described and their effect on malocclusion is demonstrated. The lecturer uses clinical evidence to illustrate these variations and how they can be modified by the A.L.F. appliance. You will discover how a rationale for parafunctional movement has been developed as a result of this approach.

On Day 2 Dr. Strokon examines relevant diagnostic techniques and explains the correlation of chairside findings with radiographic and articulator-derived information. The greater part of the day is devoted to the A.L.F. appliance design and its clinical application. The insertion of the appliance and its adjustments are demonstrated. Particular attention is given to the bio-compatible properties of the A.L.F. and its relevance to current, low-force orthodontics.

THE SPEAKER, DENNIS STROKON B.S., D.D.S.

Dr. Dennis Strokon has used orthopaedic and orthodontic techniques for many years in conjunction with his advanced restorative practice. He now uses the A.L.F. appliance extensively in his practice. He finds the concepts involved in diagnosis of cranial based problems apply equally to restorative and temporomandibular procedures as well as to orthodontics.

Dr. Strokon has studied with the dental pioneers in the field of functional cranio-anatomy and physiology and owes a great deal of his knowledge of A.L.F. treatment to Dr. Darick Nordstrom who originated the A.L.F. concept.

The entire focus of his practice has changed from using a conventional approach to a more specific individual treatment utilizing A.L.F. principles. Dr. Strokon works closely with therapists who have cranial skills.

Together with Dr. Gavin James, Dr. Strokon co-authored nine articles on Cranial Movement and its relationship to malocclusion. These articles have appeared in four dental journals and have been awarded Honourable Mention-Golden Pen by the International College of Dentists, USA Section. Dr. Strokon has lectured to several groups of dentists and osteopaths in Canada, U.S.A. and the U.K.

*This seminar is sponsored by the Orthodontic Forum Study Club, recognized by the Royal College of Dental Surgeons of Ontario
Continuing Education Committee for 12 Credits
Attendance will be limited.*

REGISTRATION:

NAME _____

(please print)

ADDRESS _____

BUSINESS TELEPHONE _____

HOME TELEPHONE _____

E-MAIL _____

TUITION:

A) Dentists, dental technicians, tuition is **\$950.00** Canadian Funds *(Course-1 Manual included)*

B) Dental assistants, physiotherapists, osteopathic clinicians, tuition is **\$550.00** *(Manual not included)*

C) Repeat attendees in all categories, tuition is **\$550.00** *(Manual not included)*

Cheques or money orders payable to:

Cranialign Inc. 95 – 15715 34th Ave., Surrey, B.C. V3S 0J6 Canada

Telephone: 604-541-3663

* * **Cheque or money order only please. N.B. Payment must accompany registration form to confirm attendance.** * *
